## Amendments to the Claims

This listing of claims will replace all prior listings of claims in the application.

## Listing of Claims

1. (Previously Presented) A method for preparing a solid acid catalyst containing crystalline metastannic acid, comprising: preparing a support comprising a crystalline metastannic acid, bringing the support into contact with organic acid ions, then bringing the support into contact with a sulfate group-containing compound, and then calcining the support.

## 2. (Canceled)

- 3. (Currently Amended) A solid acid catalyst <u>obtained</u> by the method of Claim 1, the catalyst containing crystalline metastannic acid and having a tin content of not less than 30% by weight as metal in the catalyst, a sulfate group supported thereon and an absolute value of argon adsorption heat of 30 kJ/mol or more, which is used in acid-catalytic reactions.
- 4. (Original) The solid acid catalyst according to Claim 3, wherein, in the infrared reflection spectrum of the catalyst, reflectance at  $1280~\rm{cm}^{-1}$  is less than reflectance at  $1220~\rm{cm}^{-1}$ .
